

How to Configure your ScallIT Private Communications Network with Apple iChat

Step 1

Click on the “iChat” icon in the Apple Dock

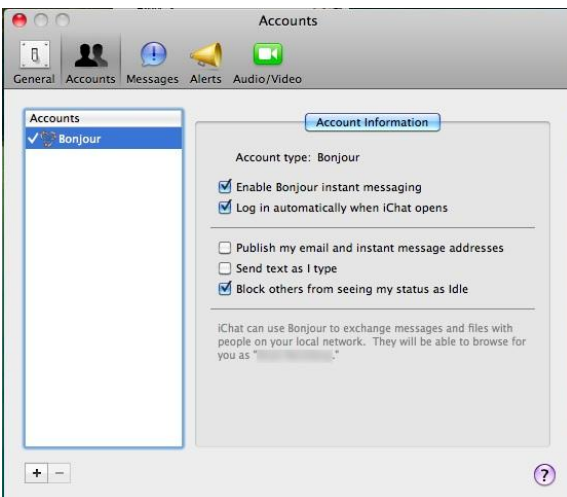

Step 2

In Apple iChat, from the menus at the top of the screen, select “File,” then “Preferences...”

Step 3

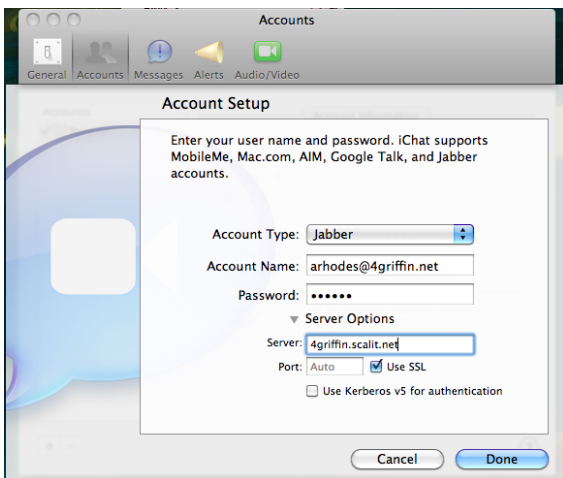

On the dialogue box that opens, click on the “Accounts” tab/picture. Next, click on the “+” button in the lower left corner of this dialogue box.

Step 4

On the screen labeled “Account Setup,” do the following:

1. From the “Account Type” drop down box, select “Jabber”
2. In the “Account Name” field, type your full ScalIT email address
3. In the “Password” field, enter your password
4. Click on the triangle next to “Server Options,” and enter the following information
 - Server: *yourdomain.scalit.net* Be sure to truncate the .com or .net from your company’s domain. For example *4griffin.net* becomes *4griffin.scalit.net*
 - Port: leave blank (Auto)
 - Check the “Use SSL” checkbox
 - Press the “Done” button

Congratulations! You have just configured Apple iChat for your new ScalIT Private Communications Network Account.
